DUAL LED MICROSCOPE ILLUMINATION UPGRADE

- ❖ Potentiometers provide for independent control over left and right objectives
- ❖ Easy loading of wafers and piece parts
- ❖ Kit displays Z-Axis positions and Air Regulator voltage
- ❖ SCS, Inc. will remove the front rail of the microscope to improve viewing of wafers and small piece parts
- ❖ Installation of a 8" monitor inside the chamber to help with the initial placement of small wafer pieces
- ❖ Eliminates CCD auto-grain contrast issues between objectives
